Typefaces

Home Button: BD Brick 2007

I chose this font for a singular use as it was perfect for stating the minimalist mid 2000's throwback design I was going for. However this font is also very big and chunky so I could not use it for anything else, plus as a decorative font it is best used sparingly.

Buttons: Myriad Pro Bold

I chose this font for the buttons because of its relatively clean look, needed for the design look I was going for. The reason I bolded them was to differentiate the button text from the text used for everything else.

Textboxes/Dropdowns/Footer: Myriad Pro Regular

To see why I chose this font look at the entry for "buttons" as this is the same font used for that, the only difference being the fact it is not bolded. Again to see why I used the regular, look at the entry for "buttons again"

1 Hex: #edddc6
RGB: 237,221,198

2 Hex: #2e2c2b
RGB: 46,44,43

3 Hex: #262626
RGB: 38,38,38

4 Hex: #3d3d3d
RGB: 61,61,61

I chose these colors as they matched the colors in the photo that I use for the background of the webpage. Specifically I chose the color of the pan for the menu bars & footer, while for the text I chose the color of the rice so it would stand out on the black background.
